Echo Dot is a hands-free, voice-controlled device that uses voice commands through an Alexa personal assistant to play music, control smart home devices, make calls, send and receive messages, provide information, read the news, set alarms, read audiobooks from Audible, answer questions, play the news, play music and hundreds of other tasks.

- Connects to speakers or headphones through Bluetooth.
- Hears you from across the room with 7 far-field microphones and hands-free control, even in noisy environments or while playing music.
- Includes a built-in speaker so it can work on its own as a smart alarm clock.
- Alexa has skills, always getting smarter and adding new skills like tracking fitness, playing
